Re: Oregons Coastal Nonpoint Polution program.

We have a small farm off the Middle Fork of the John day River. We, for 18 years now , have had Camp Creek fenced on both sides and the cattle are only allowed to cross at certain crossings.

We are very carefull about the contamination in our area. We have Steelhead and Salmon that follow camp Creek up to spawn.

Oregonians are extremely aware of the problems some states have with pollution. WE do all we can to control any contamination in our streams.

Some of us , Cattlemen, are also avid fishermen!

Please consider what we as cattlemen have done and how hard we have worked to be inline with NOAA.s requirments.
